

# AUSTRALASIAN SOCIETY FOR SOCIAL & AFFECTIVE NEUROSCIENCE

## 5<sup>th</sup> ANNUAL MEETING BRISBANE, JUNE 20-21 2018

This conference showcases social and affective research in clinical populations, neuroimaging, and animal models.

**ABSTRACT DEADLINE EXTENDED – MUST CLOSE APRIL 15!**

### KEYNOTE SPEAKERS

Raymond Chan

Dhanisha Jhaveri

Emma Burrows

Christine Guo

**Raymond Chan – Hedonic processing impairments in clinical and subclinical samples: Convergent evidence from findings of self-reported, behavioural and imaging paradigms.**

Distinguished Professor of Neuropsychology and Applied Cognitive Neuroscience  
Institute of Psychology of the Chinese Academy of Sciences

**Dhanisha Jhaveri – Neural mechanisms of anxiety and depression: What do animal models tell us?**

Mater Foundation Senior Research Fellow  
Queensland Brain Institute

**Emma Burrows – Translational behaviour in preclinical mouse models of brain disease.**

NHMRC-ARC Dementia Research Development Fellow  
Florey Institute of Neuroscience and Mental Health

**Christine Guo – Probing the neural and physiological basis of emotion using dynamic naturalistic paradigms.**

Team Head (Mental Health Program)  
QIMR Berghofer

### PRE-CONFERENCE WORKSHOPS – JUNE 19

#### Cognition, genes, and hormone

*Dr Caroline Gurvich and Dr Natalie Thomas*

This workshop will provide an overview of the role of endogenous and exogenous sex hormones on cognitive functioning, and how early life trauma can trigger neuroendocrine dysfunction and contribute to mental health outcomes.

#### Using brain stimulation to study the human brain

*Dr Hannah Filmer*

This workshop will give an overview to the use of transcranial magnetic stimulation and transcranial electrical stimulation in human research, including experimental design, and examples of the types of questions that can be asked with these approaches.

**Submit your abstract and register for the workshops at  
<http://www.as4san.com/abstract-submission/>**
