WORDS FROM OUR PRESIDENT

It is with much pleasure that I share my first 'words from the president' with you. I would like to begin by formally thanking Prof Tamara

Ownsworth for her tireless contribution as president. Tamara's leadership in the presidential role has been magnificent and she has steered our ship with great vision, expertise and poise, not to mention her energising sense of fun! I'm certainly very fortunate to have her wisdom on call as our past president. I would also like to acknowledge the exceptional work of our outgoing past president Professor David Shum and warmly welcome our new president elect Prof Robyn Tate, already well known to you all for her enduring contribution as a founding co-editor of *Brain Impairment*.

It was indeed an honour to take on the presidential role in the midst of our 40th annual Brain Impairment Conference. What a resounding success our 40th celebration was! I extend a huge thank-you to Dr Dana Wong who so generously and skilfully convened this milestone event and to Margaret Eagers who yet again showed that her organisational prowess is without match. As the wonderful 40th slips into our long-term memory, the 41st will be upon us before we know it. *Connecting and collaborating* - a perfect theme for an ASSBI conference. Please put your heads together now to collaborate with colleagues and submit your abstracts to share with us in Adelaide.

Now let me draw your attention to the professional development program for the remainder of 2017. We have workshops and webinars covering a broad range of interests for all from *e-health*, through *medico-legal work*, to *activities of daily living skill retraining* culminating with *rare and unusual syndromes*.

ASSBI is committed to making a difference in the lives of people with brain impairment. I look forward to working

towards our vision with you all and to build on the foundations so firmly laid over the last 40 years.

Best wishes,
Jacinta Douglas, President

EXECUTIVE OFFICER'S REPORT

Don't forget to check out our [Calendar](#) on the website which shows ALL our Professional Development Dates as well as Training, Meetings and Conferences from other organisations for 2017 and into 2018. If you want to put an event on the Calendar please [email me](#) details.

If you haven't renewed your membership you can now – all memberships are valid for a full 12 months and you will get a substantial discount to the conference in Adelaide in 2018.
Cheers, Margaret Eagers, EO

NEWS

We would like to congratulate Professor Jennie Ponsford, ASSBI Secretary and Fellow who was appointed an Officer of the Order of Australia (AO) in recognition of her service to the field of neuropsychology through seminal advances in the diagnosis, treatment and rehabilitation of patients with traumatic brain injuries in the Queen's Honours this year.

ARTICLE published in *Neuropsychological Rehabilitation*

Honan, Cynthia A., McDonald, Skye., Tate, Robyn., Ownsworth, Tamara., Togher, Leanne., Fleming, Jennifer., Anderson, Vicki., Morgan, Angela., Catroppa, Cathy., Douglas, Jacinta., Francis, Heather., Wearne, Travis., Sigmundsdottir, Linda., Ponsford, Jennie

Outcome Instruments in Moderate-to-Severe Adult Traumatic Brain Injury: Recommendations for use in Psychosocial Research

What the project was about

The Australian National Health and Medical Research Council's (NHMRC) 'Moving Ahead' Centre of Research Excellence (CRE) in Brain Recovery was established in 2012 to address issues related to psychosocial rehabilitation of individuals following traumatic brain injury (TBI) from a multidisciplinary perspective (see McDonald et al., 2012). One aim of the CRE was to develop a coherent framework within which to guide the activities of researchers addressing psychosocial functioning and remediation following TBI. Part of this framework involved recommending outcome instruments for psychosocial research, more specifically: (1) assisting researchers with the selection of appropriate instruments for the type of study being conducted, and (2) aligning the research activities across TBI research centres and across disciplines (e.g., speech pathology, occupational therapy, clinical psychology, social work, neuropsychiatry and neuropsychology). A major benefit of these recommendations is increased cross-centre collaboration and data-pooling, which in turn would assist in improving the quality and compatibility of research into psychosocial functioning following TBI. In response to these CRE aims, this project aimed to identify a set of adult outcome instruments for moderate-to-severe TBI psychosocial research.

What we did

A review of 115 instruments (identified through nomination, literature search, international expert opinion) was conducted over a 15-month period by the Moving Ahead CRE Outcome Measure Working Group. This group comprised 12 internationally renowned clinical researchers from research institutions across Australia, all of whom have substantial expertise in assessing and researching psychosocial outcomes following TBI. The working group comprised speech pathology, occupational therapy, clinical psychology, and clinical neuropsychology. Eleven psychosocial areas were examined: Global Outcome, Communication, Social Cognition, Behavioural and Executive Function, Other Neuropsychological Functioning, Psychological Status, TBI-related Symptoms, Activities and Participation, Support and Relationships, Sense of Self, and Health-related Quality of Life. Individual instruments were considered against *selection guidelines*, and specific measures that best met the guidelines were identified as core (common across all studies), supplemental (dependent on study type) or emerging. Recommendations were made for early recovery, intervention, and outcome (post-acute) study types.

What we found

In total, 56 instruments were recommended. They included three Global Outcome, eight Communication, two Social Cognition, three Behavioural and Executive Function, seven Other Neuropsychological Functioning, seven Psychological Status, four TBI-related Symptoms, six Activities and Participation, five Support and Relationships, seven Sense of Self, and four Health-Related Quality of Life, instruments. They were classified also in accordance with the World Health Organisation's International Classification of Functioning taxonomy and were consistent with the identified ICF core sets for individuals with TBI.

What next

The recommendations provide guidance on the use of outcome instruments by researchers conducting psychosocial research in individuals with a moderate-to-severe TBI. These recommendations represent a significant advance in the forging of a strong research environment by building research capacity in psychosocial function after TBI. By using a common set of instruments that have been judged by a panel of experts to be most appropriate for psychosocial research, researchers can

enhance their research efforts and findings. The use of a common set of recommended outcomes, in particular, will better allow research outcomes to be compared, and allow data to be pooled so that significantly larger samples can be collectively examined. Future amendments to these recommendations will allow for the accommodation of new emerging instruments and new emerging areas of psychosocial research.

Honan, C. A., McDonald, S., Tate, R., Ownsworth, T., Togher, L., Fleming, J., ... & Ponsford, J. (2017). Outcome instruments in moderate-to-severe adult traumatic brain injury: recommendations for use in psychosocial research. *Neuropsychological Rehabilitation*, 1-21. (Article available online ahead of print). doi: [10.1080/09602011.2017.1339616](https://doi.org/10.1080/09602011.2017.1339616)

CORPORATE PARTNERS

An update from our Corporate Partners, Shine Lawyers

Your Quick Guide to NDIS eligibility

Jamie Shine, National Special Counsel

The rollout of the NDIS has been the focus of much discussion at recent conferences we have attended, with eligibility the main concern for service providers.

Eligibility for the NDIS is assessed on a case by case basis and the focus is on the permanence of the disability and how it impairs a person's functional capacity and their capacity for social and economic participation.

The kinds of supports that are funded by the NDIS are also assessed based upon the individual participant's needs. Examples of support services that could be made available to your clients include everything from home and vehicle modifications, therapeutic aids and equipment to daily help with personal care, house cleaning and gardening.

To help ASSBI members make informed decisions we have put together a Quick Guide to the NDIS criteria.

For a look at the more detailed fact sheet please [click here](#).

Should you have any questions regarding the NDIS or the eligibility of your clients, please don't hesitate to reach out - 0421 951 810 or jshine@shine.com.au.

Any questions please reach out!

PROFESSIONAL DEVELOPMENT

The full webinar programme is up on the ASSBI Website AND on our new [CALENDAR](#) – go to the [Professional Development Page](#) of the ASSBI website to find out about all our upcoming events.

If you would like to see someone give a workshop in your State or know of anyone coming to Australia in 2017 who would like to give a workshop or webinar for ASSBI members, please email [Margaret](#) and we will endeavour to organise a full/half day workshop or a one hour webinar.

2017 Webinar Series #assbiwebinars

The remaining 2 more webinars in the 2017 series that you can watch live will be broadcast via Zoom. There are 3 that you can register for and watch on demand. [Click here](#) for information on the webinars and speakers. Webinars go for 1 hour from 12.30pm – 1.30pm Sydney/Melbourne time. [REGISTER NOW](#)

	10th October <i>Digital health and e-health technology for ill and injured children and their families: What's the evidence?</i> Prof Vicki Anderson
	12th December <i>Rare and Unusual Syndromes</i> Dr Michael Perdices
	AVAILABLE ON DEMAND <i>Beyond Cognitive Rest: Treating Patients with Persistent Cognitive and Somatic Symptoms Following Concussion</i> Prof McKay Moore Sohlberg
	<i>Stem Cell Interventions Hype or Hope</i> Prof Iona Novak

Evidence-based management of impaired self-awareness following brain injury

2017 Workshops

#assbiworkshops

Jessica Trevena-Peters, Jennie Ponsford and Adam McKay will be giving a full day training workshop in Melbourne for OT's on **9th October** entitled: *An evidence-based intervention for activities of daily living skill retraining*. This workshop will also be streamed around the country – there will be 2 payment tiers, one for attendance in Melbourne and one for streaming. [Click here for more information and to register.](#)

Workshop Overview | Medico-Legal Work: Everything you need to know from the report to the court room

Clinicians and treatment providers may feel apprehensive about entering the world of Medico-Legal reporting. This reluctance can stem from grappling with the reporting requirements, or inexperience in the Court room. In order to overcome such reservations, ASSBI and Shine Lawyers have developed a detailed workshop to provide practitioners with insight into the Medico-Legal process - from the structure of the report, through to giving evidence at trial.

The workshop will follow a logical process starting with the assessment of the client and preparation of the report. This will include recommendations regarding the report's structure, contents and expert opinion. From there, the workshop will discuss the process of preparing for trial, appearing in Court, giving evidence and being cross-examined.

The workshop will be delivered from the perspective of a provider, an instructing lawyer and a barrister, to provide allied health and medical health professionals with a holistic understanding of Medico-Legal work. The session will formally conclude at 5:00PM, followed by drinks and nibbles hosted by Shine Lawyers which will allow attendees and presenters to engage in a social environment.

This workshop will be held in Sydney on 6th, Perth on 12th, Brisbane on 20th and Melbourne on 27th of October

[Click here for information on Venues, Speakers and to Register](#)

ASSBI CONFERENCES 40th Conference

The 40th Conference was held in Melbourne this year. Dr Dana Wong was the convener and we had 445 delegates attend from all over the country as well as international visitors. For a full copy of the conference report [click on this link](#).

ASSBI CONFERENCES 41st Conference - #assbi2018

The 41st Annual Brain Impairment Conference will be held in Adelaide, South Australia on 3rd to 5th May 2018. The theme is *Connecting and Collaborating in Rehabilitation* and is being convened by Elizabeth Williams.

The Call for Abstracts is open, be a part of this conference and submit an abstract for an oral presentation, Datablitz, How to Session or Poster. We have dropped Symposia as a submission type so we can have more oral and How to Sessions. The **Call for Abstracts closes on 19th October**

- this link will take you to the call for abstracts which you can download as well as show you how to set out your abstract and submit it to Easy Chair: <http://www.assbi.com.au/confcallabstracts.htm>
- This is the link to actually submit your abstract: <https://easychair.org/conferences/?conf=assbi2018>

We have 3 International and 2 National Keynote Speakers read their bios below

Dr Caroline Ellis-Hill

Caroline is a Senior Lecturer in Qualitative Research at Bournemouth University, England in the UK. Having a clinical background in

occupational therapy and a PhD in psychology, she has a long-standing interest in sense of self and identity in acquired brain injury and has written on the topic over the last 15 years. Since working at Bournemouth University Caroline's research focus has been humanising practices – considering *what makes us feel human*; which is linked with a sense of connection and wellbeing; building on the philosophical work by previous academics at the University. Using this approach Caroline has completed two major research projects involving the use of arts following a stroke and looking at how we can humanise services in acute care. Through this research, Caroline and her colleagues are developing a new approach to rehabilitation: that of lifeworld-led rehabilitation where the subjective, lifeworld experience of both service users and providers are combined to form the basis for understanding and service delivery, allowing a fully human response within care and rehabilitation services. Caroline will be presenting a half-day Workshop entitled: *Working alongside people following brain injury: a 'hands on' exploration of human connection and sense of wellbeing* and a one-hour Keynote presentation entitled: *Lifeworld-led rehabilitation – a new approach to support psychosocial wellbeing following brain injury*

Dr Tim Feeney

Dr Tim Feeney is Senior Vice President of Belvedere Health Services in Albany, New York; an organisation that offers substance abuse treatments and services for people living with mental and substance abuse disorders. Tim's extensive list of achievements include leading a strengths-based therapeutic and social service and educational program for at-risk youth and families with behavioural and educational challenges as Executive Director of Transitional Services for Youth and Families in Vermont USA; and his role as Director of the Overcoming Barriers to Learning Centre in NY – helping children with learning disabilities, autism and ADHD self-regulate behaviour through the use of specific scripts and tools. Over Tim's highly successful 25-year career he has authored over 50 scholarly journal articles and book chapters and has been responsible for the procurement and coordination of over \$10 million in grant-funded programs serving individuals with

behaviours of concern. Tim will be presenting a half-day Workshop entitled: *From consumer to producer: Rehabilitation as a social imperative* and a one-hour Keynote presentation entitled: *What exactly is evidence-based practice: Finding evidence in our day to day work to support our work every day.*

A/Prof Nicola Kayes

Nicola graduated from the University of Auckland with her masters in health psychology in 2000 and her PhD from AUT University in 2011. Her doctoral work explored physical activity engagement for people with Multiple Sclerosis. She has been working in the Health and Rehabilitation Research Institute since 2005 as a member of the Centre for Person Centred Research (PCR) and is currently contributing to both research and teaching in her role as Senior Lecturer and Associate Director of PCR. Since joining AUT University in 2005, she has contributed to a range of research projects resulting in related publications in a range of international journals including Clinical Rehabilitation, Archives of Physical Medicine and Rehabilitation, Neuropsychological Rehabilitation and Journal of Psychosomatic research. Nicola will be presenting a half-day Workshop entitled: *Co-creating health: supporting people to live well in the context of a neurological condition* and a 30-minute Keynote presentation entitled: *How do we do person-centredness? Building connectivity, trust and capability in the midst of an unstable reality.*

A/Professor Grahame Simpson

Grahame is Director of the Brain Injury Rehabilitation Research Group at the Ingham Institute of Applied Medical Research in Liverpool Sydney. He is Associate Professor at Griffith University and a Principal Research Fellow at the Australian Health Services Research Institute, University of Wollongong. He has dual professional qualifications as a social worker and psychologist, and has worked for the past 30 years as a clinician and researcher based at the Liverpool Brain Injury Rehabilitation Unit in Sydney. Grahame's research interests focus around positive adjustment to traumatic brain injury in the areas of suicide prevention, sexual health, challenging behaviour,

STUDENTS CORNER

ASSBI is looking for new student Ambassadors for 2018 and 2019

Positions available are:

- Student Co-ordinator – 2-year term
- Team Leaders – 2-year term
- Ambassadors – 1-year term

Please click on this link to apply for any of the positions

https://monash.az1.qualtrics.com/jfe/form/SV_0wSmisXOzCCNSRf

ASSBI Travel Grants of \$800 plus registration to #assbi2018 are available – submit an abstract and then apply

After a successful first semester of 2017, our student teams have been busy organising some fantastic events for Semester Two all-around Australia and NZ. Keep an eye-out for upcoming events hosted by ASSBI student teams in your region via ASSBI social media pages!

Melbourne Team

The ASSBI Melbourne team hosted their first event on Friday 11th August at Happy Melon studio for a guided mindfulness meditation session followed by a screening of the documentary 'Alive Inside'. Following the movie attendees shared their thoughts and experiences of loved ones living with brain impairment. On the door donations totalling \$70 were donated to the Alive Inside Foundation which works to bring personalised music therapy to individuals with dementia and connect younger members of the community with elders through the 'empathy revolution'. A big thank you to Happy Melon for sharing their space with the ASSBI student team for this event.

Sydney Team

The ASSBI Sydney team hosted a trivia night at Bar Cleveland in July. Over 20 people attended and the event was a great success!

For full reports on student events go to the [Student News Page](#)

For any student enquiries email students@assbi.com.au

psychosocial re-integration and family resilience. He is a past NHMRC research fellow and Luria prize winner; he was an invited participant in the WHO ICF TBI Core sets consensus conference and has served on several other national and international advisory committees. He is current Co-Editor of Brain Impairment; member of two other editorial boards (Journal of Head Trauma Rehabilitation; Australian Social Work); convenor of the National Research Committee of the Australian Association of Social Workers; and co-founder of the International Network of Social Workers in Acquired Brain Injury. Grahame will be presenting a half-day Workshop entitled: *Understanding and building family resilience after traumatic brain injury* and a thirty-minute Keynote presentation entitled *Building connections: Interventions to improve vocational, family and personal outcomes after severe TBI*.

Professor Jacinta Douglas

Jacinta is Professor of Acquired Brain Injury and holds the Summer Foundation Research Chair in the Living with Disability Research Centre at La Trobe University, in Melbourne, Australia. She has qualifications in the disciplines of speech pathology, clinical psychology and neuropsychology and is a Fellow of the Australasian Society for the Study of Brain Impairment and the Speech Pathology Association of Australia. Jacinta has authored more than 95 peer reviewed journal publications and 9 book chapters and has delivered numerous keynote and invited presentations and professional workshops. Jacinta will be presenting the ASSBI Presidential Address.

BRAIN IMPAIRMENT

ASSBI's multidisciplinary Journal

The inaugural winner of the Douglas and Tate prize for best research paper published in 2016 is Dr Anna Emmanouel for her paper titled "Script generation and executive dysfunction in patients with anterior and posterior lesions". The prize was created in honour of Jacinta Douglas and Robyn Tate in recognition of their work as founding Editors of the journal. The winner received a \$500 prize sponsored by our publisher, Cambridge University Press. Congratulations Anna

You should have received login instructions when you joined ASSBI, if you require any help with this please email Margaret Jennifer Fleming and Grahame Simpson Co-Editors

ASSBI RESOURCES

All ASSBI manuals are now 10% OFF for ASSBI and INS members

ASSBI has a new manual available for sale at \$155 entitled *Understanding Acquired Brain Injury and behaviour change: A guide to managing challenging behaviours* by Sue Sloan. You can order this on the

ASSBI website. The updated TASIT and brand new TASIT-S will be available for sale shortly.

I would like to remind everyone that in addition to the manuals that ASSBI has for sale Members of ASSBI can download many free tests including the Austin Maze.

Non-members have access to some free downloads too – [click here](#) to see the full

list of manuals and free to downloads on offer
Skye McDonald
Resources Manager

NON-ASSBI EVENT

See page 6 for information on conferences being held in 2017 and 2018 by Associations other than ASSBI.

15th NR-SIG-WFNR
Conference
Prague, Czech Republic
15-16 July 2018

The 15th #nrsigwfnr2018 is being held at the Grandior Hotel in Prague, Czech Republic on 15-16 July just before the

INS Mid-Year Meeting on 18-21 July which is also being held in Prague.

PsycBITE™

We want to know our users!
Please visit www.psycbite.com to complete our survey
Psychological Database for Brain Impairment Treatment Efficacy

Learn more about evidence based practice; understand more about scientific evidence underpinning remediation and rehabilitation: Become a rater for PsycBITE

What is PsycBITE?

PsycBITE is a world-class, living e-resource that archives all published literature on psychological treatments for people with chronic diseases and disorders from acquired brain impairment. Launched in 2004, PsycBITE updates the literature monthly. It currently archives 4,000 empirical papers.

ASSBI MEMBERSHIPS

JOIN/RENEW

ARE NOW ANNIVERSARY which means that your membership lasts for a full 12 or 24 months

- ✓ Full member cost
 - ✓ \$150 for 1 year
 - ✓ \$257 for 2 years
 - ✓ Student Cost
 - ✓ \$80 for 1 year
 - ✓ \$144 for 2 years
- (students please email id proof to admin@assbi.com.au)

Advantages of being an ASSBI member include:

- ✓ Substantial discount off registration fees for the 2018 ASSBI conference in Adelaide
- ✓ Discounted registration to all ASSBI workshops and the webinar series
- ✓ Access to Brain Impairment online
- ✓ 4 Newsletters per annum
- ✓ Access to previously published papers with normative data on tests for children, adults and older adults.
- ✓ If you refer someone to ASSBI and they join you will receive a 10% discount on any ASSBI run workshop or webinar

Information on Membership can be found at www.assbi.com.au.
Not sure if you are financial? go to the website to find out.

MEMBERS please go to the [members page](#) to update your profile, you can also add a photo, you are also able to contact other members via email.
